EDUCATION

MSc Methodology and Statistics   **2019 - 2022**
Utrecht University, Netherlands   *Cum laude (GPA 8.9/10)*

○ Thesis - Combining support for hypotheses over heterogeneous studies with Bayesian Evidence Synthesis: A simulation study (supervised by Prof. Dr. Irene Klugkist).

MSc Sociology and Social Research   **2019 - 2022**
Utrecht University, Netherlands   *Cum laude (GPA 8.7/10)*

○ Thesis - The future is made today: Concerns for reputation foster trust and cooperation (supervised by Prof. Dr. Ir. Vincent Buskens & Prof. Dr. Werner Raub).

BA Liberal Arts & Sciences   **2016 - 2019**
Utrecht University, Netherlands

○ Major in Pedagogical Sciences; minor in Sociology and Social Research

EXPERIENCE

PhD candidate Synthetic data   **2022 - Current**
Utrecht University
○ Supervisor: Dr. Erik-Jan van Kesteren
○ I investigate how to optimize the creation of synthetic data in terms of the risk-utility trade-off.

Internship MICE Group   **2020 - 2022**
Utrecht University
○ With Dr. Gerko Vink I established a framework on how to generate synthetic data with the R-package `mice` to preserve privacy and confidentiality.

Research Assistant   **2019 - 2022**
Utrecht University
○ For Dr. Peter Lugtig, I worked on research and teaching related topics, (e.g., creating content for the research master level course 'Survey Data Analysis', by developing a Shiny App, creating data visualizations and creating the webpage https://www.peterlugtig.com.
○ For Dr. Rebecca Kuiper, I created data visualizations and assisted PhD students by revising text.

Teaching assistant   **2018 - 2022**
Utrecht University
○ Thesis co-supervision:
  – Multiply imputed synthetic datasets - assessing validity of multiply imputed synthetic datasets with the R-package `mice` (Master's thesis, with Dr. Gerko Vink).
  – Comparing multiple methods of research synthesis (Bachelor's thesis, with Prof. Dr. Irene Klugkist).
○ Post-graduate level courses:
  – Multiple Imputation in Practice (MIMP; Utrecht Summer School 2019-2021) - supervision of practicals and providing R assistance.
  – Statistical Programming with R (Utrecht Summer School 2021) - supervision of practicals.
  – Advanced Survey Design - supervision of practicals.
○ Master's level courses:
  – Network Analysis (2020-2021) - developing practical assignments and supervising the practicals.
  – Methodological and Statistical Aspects of Social Science Research - teaching working groups of about 20 persons on topics ranging from multiple regression to moderation and mediation analysis.
○ Bachelor's level courses:

– Theory Construction and Statistical Modeling - teaching practicals on structural equation modeling using `lavaan`.
  – Various undergraduate courses on standard statistical methods.

ASReview   **2021**

Utrecht University

○ Researcher at ASReview - an open-source project that helps researchers to screen (tens of) thousands of papers automatically for inclusion in systematic reviews, meta-analyses, medical guidelines, or overviews.

Other

Debuut   **2019 - 2020**

Utrecht University

○ Buddy programme at Utrecht University to match potential first generation university student with actual students to get a flavour of what studying at a university entails.

IOPS   **2022 - Current**

PhD Representative

○ Represent PhD candidates in the Interuniversity Graduate School of Psychometrics and Sociometrics.

Received funding

SynthEval   **2023-2024**

Project lead

○ An R package for evaluating and improving the quality of synthetic data sets. For €15.000.

Statistical software proficiency

○ `R`
○ `MPlus`
○ `SPSS`
○ `HLM`
○ `JAGS`
○ Learning `python`
○ Learning `C++`

Invited presentations / workshops

Fake it 'till you make it: Generating synthetic data with high utility in `R` [with Erik-Jan van Kesteren], Tübingen Open Science Winter School, 13 February 2023, Tübingen, Germany.
Creating synthetic data with `mice` in `R` [with Gerko Vink], UMCU, 4 November 2022, Utrecht, the Netherlands.

Software Vignettes

Volker, T. B. & Vink, G. (2022). `futuremice`: The future starts today. `https://www.gerkovink.com/futuremice/Vignette_futuremice.html`

Software development

- ○ `mice` [ctb] - Developed functionality to pool inferences from synthetic data and implemented `futuremice` to speed up imputation by using user-friendly parallel processing.
- ○ `ggmice` [ctb] - Adjusted functionality to allow for visualization of synthetic data.
